PROJECT DESCRIPTION

This project provides for the replacement of the force main that serves the Lakeshore pumping station. Proposed 4,000 LF of 12" FM replacement.

COMMUNITY BENEFITS

The force main replacement project will replace aging, deteriorated pipelines that have reached the end of their useful life and are susceptible to failure that can cause wastewater overflows that impact public health, safety, and the environment. The new force main will provide additional capacity for future development and lower energy costs of public and private pumping stations.
