PROJECT DESCRIPTION

This project provides for Diffused Air Reactor (DAR) Improvements Phase 1 at the Howard F. Curren AWTP. The project includes upgrades to the existing diffused air reactor system, mixer replacements, and related mechanical, electrical, instrumentation, and control improvements necessary to improve treatment process reliability and performance.

COMMUNITY BENEFITS

The treatment plant project will restore the plant's reliability by replacing aging equipment and infrastructure. The project will include improvements to the treatment process that enhance nitrogen removal capabilities and support regulatory compliance. The project will also incorporate modern technology to improve operational efficiency, process control, and overall treatment performance.

The cost and schedule data shown here are the City's current best estimates and are subject to change. Data is current as of the 15th of each month.

Printed: November 7, 2026
