PROJECT DESCRIPTION

This project includes the rehabilitation of approximately 15,087 linear feet of 8-inch to 21-inch diameter gravity sewers and the rehabilitation of 45 manholes.

COMMUNITY BENEFITS

The collection system rehabilitation project will restore aging sewer pipes and manholes to restore their service life. Project impacts will be minimal compared to a collection system "open cut" replacement project since the rehabilitation methods are trenchless. The collection system rehabilitation will reduce pipeline failures and blockages that cause wastewater overflows that impact public health, safety, and the environment. Additional project benefits include reduction in leaks that allow ground water and stormwater runoff to enter the collection system and cause wastewater overflows,...
