PROJECT DESCRIPTION

This project provides for the rehabilitation of 122nd Avenue wastewater pumping station located at 2715 E 122nd Ave. Project will include replacement of pumps, piping, valves, and electrical improvements to ensure the continued reliability of the station.

COMMUNITY BENEFITS

The pumping station rehabilitation project will restore the station's reliability by replacing the aging equipment and will include improvements to reduce vulnerability to extreme weather events. The station is a critical wastewater asset and failure of the station would result in a wastewater overflow that would impact the environment and pose a public health threat to the surrounding neighborhoods.
