PROJECT DESCRIPTION

Approximately 7,019 linear feet of water mains ranging from 8 to 12 inches in diameter will be replaced.

COMMUNITY BENEFITS

The Heights WM Improvement Project (Phase II) will improve the City of Tampa's water distribution system by replacing the existing water mains. This project will replace the aging water mains in this area with new water mains, improving water pressure and water quality while reducing the number of service interruptions that might have been caused by main breaks or leakage.
