PROJECT DESCRIPTION

This project provides for the construction of a new wastewater pumping station located at 2308 N Oregon. Project will include installation of wet well, pumps, piping, valves, and electrical equipment.

COMMUNITY BENEFITS

The new pumping station modifies the sewer collection system that serves the neighborhood by adding a new pump station and eliminating a direct connection to the adjacent trunk sewer. The modifications will eliminate overflows at the residences along Oregon Avenue during high-water event on the trunk sewer.
