PROJECT PHASE

To learn more about what activities are completed during each project phase, visit tampa.gov/projects

PROJECT DESCRIPTION

The W Riverside Heights Project will improve the City of Tampa's water distribution system by replacing the existing water mains and increasing the capacity of the system. It will also improve our ability to serve a growing population. Approximately 9,747 Linear Feet of water mains ranging from 2 to 6 inches in diameter will be replaced and upgraded.

COMMUNITY BENEFITS

This project will replace the aging water mains in this area with new and larger diameter water mains, improving water pressure and water quality while reducing the number of service interruptions that might have been caused by main breaks or leakage.
