PROJECT DESCRIPTION

The project provides for the rehabilitation of the Alaska Ave wastewater pumping station at 1017.5 E River Cove St. Project will include replacement of pumps, piping, valves, and electrical improvements to ensure continued reliability of the station.

COMMUNITY BENEFITS

The pumping station rehabilitation project will restore the station's reliability by replacing the aging equipment and will include improvements to reduce vulnerability to extreme weather events. The station is a critical wastewater asset and failure of the station would result in a wastewater overflow that would impact the environment and pose a public health threat to the surrounding neighborhoods.
