PROJECT DESCRIPTION

The project is located just west of the Tampa Distribution Center at 1212 N. 50th Street, identified as part of the broader 43rd Street Drainage Improvements due to the nearest downstream crossing. The work includes approximately 700 linear feet of concrete slope stabilization along an existing ditch, with all associated miscellaneous and appurtenant improvements needed to enhance long-term stability and drainage performance.

COMMUNITY BENEFITS

Erosion Control | Reduced Maintenance Needs | Resiliency | Natural Infiltration
