

Golf View Estates Flooding Relief

PROJECT DETAILS

PROJECT ID	1002178
DEPARTMENT ID	SW40006
CONTRACT ID	21-D-00048
PROJECT TYPE	Stormwater Engineering
PROJECT STATUS	90% Design Completion
PROJECT PHASE	P2: Design
NEIGHBORHOOD	Golfview
COUNCIL DISTRICT	4
COMMUNITY REDEVELOPMENT AREA (CRA)	Not in a CRA
FUNDING SOURCE	Multiple Funding
FUNDING COMMENTS	Stormwater Improvement Bonds, Stormwater Improvement Fee

ESTIMATED PROJECT COST

\$9,100,000

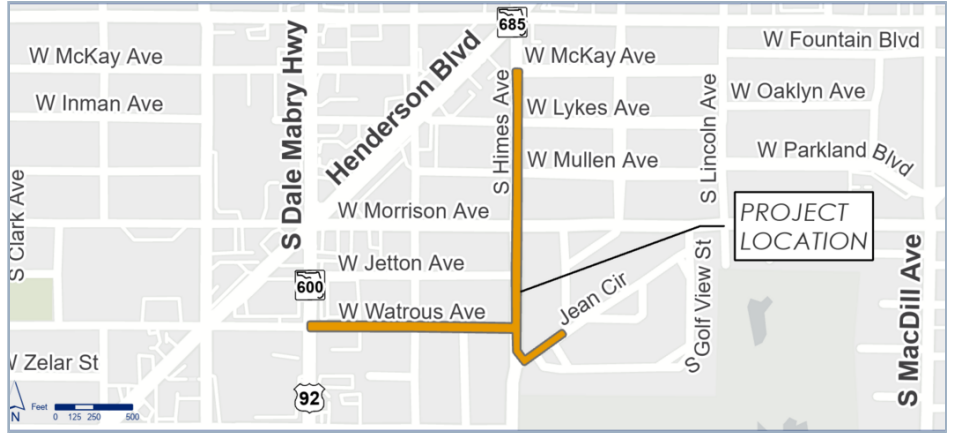

Funded: Yes

ESTIMATED SCHEDULE

CONSTRUCTION FISCAL YEAR	2027
PROJECTED START DATE	03/01/2027
PROJECTED END DATE	09/28/2028

PROJECT DESCRIPTION

Flooding occurs in low-lying areas of the Golfview Neighborhood during intense, short-duration rain due to an old, undersized drainage system, leaving streets flooded for days and vehicles stranded. This project includes designing and constructing a new drainage conveyance system and upsizing existing infrastructure in this urban neighborhood. Following FDOT's drainage improvements on South Dale Mabry Highway, the upgraded system will connect to the City's Dale Mabry-Henderson Trunkline at West Watrous Avenue. The project also provides opportunities for Green Infrastructure and water quality improvements.

COMMUNITY BENEFITS

Flooding Relief | Water Quality Improvement | Improve Traffic Flow and Safety | Restore Natural Habitats | Enhance Resiliency
