PROJECT DESCRIPTION

This project consists of design and construction of a new drainage conveyance system as well as the replacement and upsizing of the existing drainage conveyance system in a residential neighborhood in the City of Tampa. During normal rain events the area experiences street flooding due to an old and undersized drainage system. This project is located along Manhattan Avenue tying into the Emerson Ditch at 3111 Manhattan and runs north to Bay to Bay. This project will also consist of new watermain upgrades along the corridor.

COMMUNITY BENEFITS

Flooding Relief
